During the life

During the life-wide learning day, we have visited the Ma On Shan Sewage Treatment Plant and were introduced the progress of making water clear. In the time being, we also learned about the unique design of the treatment plant, which is situated in the nature and getting use of all severable spaces to place the equipments needed. These are what we appreciate a lot. Furthermore, the plant try to recycle the sewage remains during the process and thus treat this once again. A significant message is actually delivered when adopting the means. It is said that water is a valuable resource in our world. Isn't the plant precisely value water a lot as well?
