

Date: 6<sup>th</sup> October, 2010

Place to visit: Hong Kong Jockey Club Drug Info Centre (Admiralty)

Reflection:

Drug abuse is the heated topic in Hong Kong. The problem among teenagers is becoming more serious in recent years. We are glad to have the chance to visit the info centre. The centre is divided into several zones. Not only exhibitions, most of the information is presented in inter-active ways, for example, we can touch the screen to revise the basic information about the drugs, we can take part in the discussion computer program. Most attract me is the timeline of the imaginative abusers on the wall. I think it is really a creative for visitors to follow their life stages and trace for the ending. Not only the above are informative and educational, we also have a chance to watch a story in the interactive theatre. Followed by this, we are glad to invite a lady, called 'Ah Yan' who was a drug abuser to share about her experience. From my opinion, her sharing is very inspiring, which I understand more about the thoughts of the abusers. It is really a different but special sharing that I have ever heard, she is not like the people share in the normal assembly or seminar. I was moved by her sharing and decide NEVER taste drug. Overall, apart from learning more basic information about some drugs, heroin and ketamine, which are included in our AL Chemistry syllabus, I am also glad to listen to Ah Yan's impressive sharing.
