

CCC Heep Woh College
Form 6 Chemistry
Seminar Review Worksheet

Name: Hui Wai Yan

Class: 6S

Please attach the ticket / a photo to prove that you have attended the seminar.

Name of the Seminar: Drug Abuse Analysis by Urine Test

Date of Attending the Seminar: 28th November, 2009

Using ONLY the lines provided below, write the summary and comment on the Seminar.

a) Summary

This seminar is included in the "Science in the Public Service" in which the topic is about drug testing. The speaker, Mr. Wong, is a Medical Laboratory Technologists and he had divided the seminar into two parts. First, he introduced a number of common abused drug including Heroin, Methadine, cocaine and the like. Making use of photographs showing their form and appearance, the speaker stated the consequences of abusing these drugs. Second, he introduced and compared some ways of testing drug abusers like liquid chromatography, blood test and so on.

b) Comment

The public shows grave concern for the issue of drug testing scheme imposed in schools these days. Participating in this seminar give audiences a brief review on how drug abuse may affect one's health in both physical and mental ways and how different organizations test and analysis the drug-abusing rate of abusers. Being chemistry students, the principle of liquid chromatography and the structures of commonly abused drug are surely our focus. As drug abuse is a hot topic in recent year, it is important for us to apply our knowledge in daily life.

The End
