**Chemistry life-wide learning day- Review**

We have had a wonderful trip on the life-wide learning day--we have visited the Jockey Club Drug Education Centre in Admiralty. The speaker clearly introduced the properties and synthesis of different kinds of drugs, namely Heroin, Ketamine, Tranquillizers, Ecstasy, Cocaine and so on. A lot of dangers caused by these drugs are also introduced, say Ecstasy can cause dehydration, insomnia and overheating. All these give us a comprehensive picture about drugs.
