

Chemistry Life Wild Learning Day Report

Form: 7S

Name: So Ying Kin(19)

Date of visit: 6/10/2010

Date of Report: 10/10/2010

Place of visit: Hong Kong Jockey Club Drug InfoCentre in Admiralty

Reflection:

Although I have learnt lots of information about drugs in school, I still found that this visit is quite unforgettable after I had heard about the sharing done by the girl who had drug-taking experience. I am surprised that taking drugs not only cause health problems, but also many side-effects such as social problems (betrayed by friends) and family problems (poor relationships between her mother and her). I do think that if I were her, I can hardly endure these problems! So, I am sure that I will treasure my life and will not take drug!
