

## Tang Chi Chung 7S (20)

This was really a marvellous experience for us to visit the drug information centre. In the centre there was lots of drug information such as Ketamine's damage to human body. I was surprised by knowing that there were so many kinds of drugs that people abuse. Moreover, the number of victims of drug abuse had been increasing. The most memorable session was a girl sharing the drug abuse experience that she had 4 years ago. All in all, this centre was worth to visit.
