

## Visiting Sai Kung Sewage Treatment Works

4E Chan Tsz Man (3) 4E Chau Leung Kei (5)

Everyday we produce sewage. If the sewage is not under proper treatment, it will harm our environment. Therefore, a modern sewage treatment plant is needed in order to keep our environment clean.

We are glad to have such an opportunity to visit Sai Kung Sewage Treatment Works, in which we have understood more deeply about the treatment of the sewage we produce everyday. The trip also reminded us how important water is, reminded us to save water, never to waste a single drop of water.
