Fig. 1 The game console

In the Health Education Exhibition & Resource Centre ,there is a game console which with the game about the food safety and the food which we can buy in the supermarket .There are lots of food in the supermarket .In the game , we need to determine the food which displayed on the screen into different categories .

In our daily life , we usually go and shop in supermarket,but before purchase the goods you want , we dont know what ingridient is in the food , after playing this game , we learn a lot from it . now i can determine what may contain in the food by seeing the label in the cover of the food .

After visiting the health centre , we learnt a lot. It is really a unforgettable experience!!
