

2012-2013 1st Life-wide Learning Day (4E)

Class	Name	Photo	Description
4E	Cheung Yuen Tsz		<p>The cans are on the ice house. It represent the coke is sugar free as the temperature of the surrounding is below zero.</p>
4E	Chong Ngo Wai		<p>After collecting empty glass bottles from restaurants, they will be sterilized and washed. Inspection is carrying out at this returnable bottle line for ensuring they are undamaged, clean and reusable.</p>

4E Chiang Tin Ho

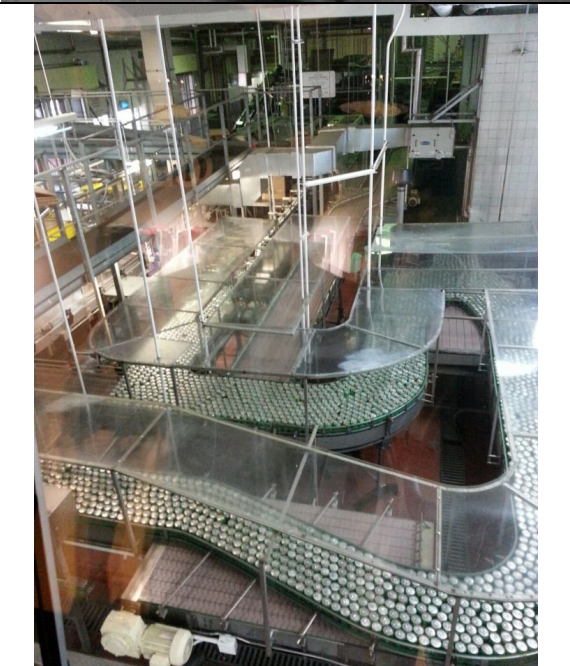

This is the space can of Coca Cola, which was the first can of drink sent to space.

4E Lam Chin Hung

It shows a machine which can wash the Coca-Cola bottles. Broken one will be picked up and thrown away. Also, a bottle only can be used for 20 times.

4E	Tam Wing Yan		 A photograph of a robot designed to look like a classic Coca-Cola can. The robot is red with the white 'Coca-Cola' script logo and the word 'Enjoy' above it. It has a silver top and bottom. The robot is mounted on a small, yellow and red base with two small wheels. It is standing on a grey floor.		<p>This is a robot which used Coca-Cola to generate power for moving. This is very unbelievable that Coca-Cola can have other use except drinking.</p>
4E	Tsang Hing Pong		 A photograph of a complex industrial transport machine in a factory. The machine consists of multiple levels of conveyor belts and rollers, all made of metal. The machine is filled with numerous small, cylindrical objects, likely cans or bottles, which are being transported through the system. The background shows a large industrial facility with various structures and equipment.		<p>It is a transport machine in the factory. The machine was not working as the progress of turning it on required four hours to do that and it was turning on during our visit.</p>

4E	Wan Chi Yeung		<p>This photo shows that Coca Cola tries to protect the environment by producing different sustainable packages. Nowadays, the company has made the plastic bottles which can be twisted.</p>
4E	Wong Yuk Wa Wendy		<p>I think the factory of Coca-cola use sustainable packaging is important for the environmental as this method maximizes the use of renewable energy.</p>

4E	Yuen Chun Ki		<p>This is the Coca-Cola can used in the space. It is about ten thousand Hong Kong dollars per each. The first space can of Coca-Cola is now in the space.</p>
