CHAN HIU WAI		<p>This is a machine which is used to clear to dirty dust in the pipes formed by the air conditioner. It uses very high air pressure to force the stopper to 'walk' along once the pipes it usually used in company which have central air-con system. It is quite interesting.</p>
KWOK SHING MAN		<p>Energy recovery ventilator</p> <p>This unit helps to reclaim moisture and heat from outdoor air entering into the conditioned space. This can reclaim 50 percent of energy from cool air.</p>

NG TSZ YING

This set-up is showing how to clean the pipes of central air conditioning system used in the large buildings by using a high pressure washer.
