CHAN KA MAN		 A photograph showing a red Coca-Cola can inside a clear plastic space can. The space can is a dome-shaped container designed to hold a can of soda in a zero-gravity environment. The can is positioned in the center of the space can, and the plastic is slightly fogged up, suggesting it's been used in a space environment. A small sign on the space can reads "COKE WOULD TASTE BETTER IN SPACE THAN ON EARTH".		<p>This can enables astronauts to drink Coca-Cola under the zero-gravity condition in space. Coca-Cola is the first soft drink company to invent the soft drink space can successfully.</p>
CHAN SZE WING		 A photograph of a display case filled with various Coca-Cola memorabilia. The case is illuminated from within, highlighting the items. There are several Coca-Cola cans, bottles, and other collectibles on display. The items are arranged on shelves, and the overall appearance is that of a museum or a collector's display.		<p>This photo shows that some toys and groceries which are made by Coca-Cola icon. They are very attractive and beautiful. I love them a lot.</p>

CHAN TSZ
YAN

The old aluminium cans are compacted in a large plastic box so as to reduce the space used.

CHEN XING
YI

A worker that is responsible for finding out the poor-quality glass bottles.

FUNG HIU
TING

The picture showed that Swire Coca-Cola HK Limited has become the most well-known and successful beverages-selling company in the world which monopolized the market of beverages.

LI WING MAN

Liquid flies randomly in space due to zero-gravity. Therefore, liquid-containers have to be designed specially. This can has special straw and can contain carbonated beverages so astronauts can drink coke.

TANG KING LOK		<p>Every bottle of coca-cola has to be sterilised, in order to ensure the coca-cola is safe to drink.</p>
WONG KA TUNG		<p>In this photo, there is a robot named R2-D2 which comes from the film Star Wars. R2-D2 in this photo is dressed in a coca-cola can. In my opinion, it is very creative for coca-cola to promote their products by adding their own symbolic features into a film character. Furthermore, it also reflects that the culture of coca-cola has been wide-spreaded to different aspects, even in films. The robot dressed in coca-cola can in the photo is really a marvelous design as it can tell us that the culture of coca-cola is not confined to coke only and I appreciate this design a lot.</p>

WONG KWAN
WA

This photo shows the development of Coca-Cola in Hong Kong from 1886 to nowadays, including the first importation and production line of Coca-Cola in Hong Kong.

YAN HOK KIU

This is the production line of a product of lemon juice. It shows that acids are commonly found and closely related to our daily lives.

YUEN LAM
LIN

It is a photo of designed coca-cola bottles by the winners of the competition. Each of them has a theme of design, such as Olympics and Hong Kong.
