<p>CHAN SIU HIM</p>		<p>This is a plate made of recycled material from the Coca Cola products themselves, which aims to promote the environmental-friendly image of their international company.</p>
<p>CHE YUI HO</p>		<p>The production line of Coca-Cola is automatically operated.</p>

FU KA FAI

The Swire Coca-Cola HK Limited has been providing a great variety of products and accompanied different generations. But the most significant one is of course, Coca-Cola!

LAI JIE RU

Today, I visited Coca cola industry and I know the history of making coca cola. It is very special that this company has made green ideas in their development.

LAI YAN YEE

The company once made a can of cola which can be drunk in the space. It is very difficult because liquids may spurt easily with the help of carbon dioxide.

LAM HO TING

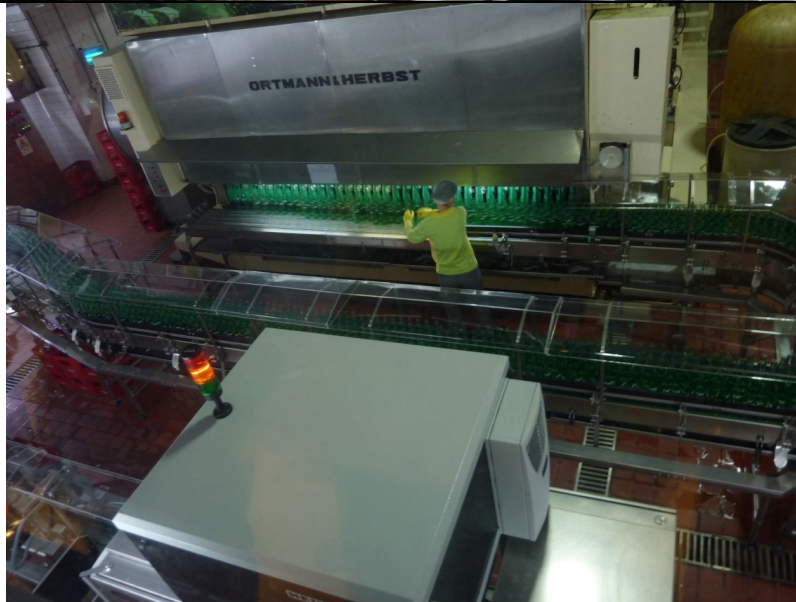

This picture shows the sewage treatment system of the Coca-Cola factory. The system consists of six parts including a rotostrainer, a pH adjustment tank, contact aeration tanks, a cavitation air flotation, sludge processing devices and setting tanks.

LAW KOK
WING

The photo shows the production of plastic bottle water. The water bottles are first cleaned with high temperature, and then filled with limited volume of distilled water. Finally closed the bottle by the machine.

LEUNG WAI
KA

The machine is making the glass bottles. Workers need to check carefully whether they are clean so that they can be sent to the next process to put Coca-Cola inside.

LING KAI
HIM

It is a chair which is recycled from the Coca-cola plastic bottles.

TANG WING
CHUNG

Mechanization is used in the factory and workers check if there is unqualified products. It is clean, save and high efficiency.

YIP KA LONG

This photo shows a part of the production line of Coca-Cola. It shows a machine which is used to sterilize the glass bottles and a worker is checking whether the sterilized bottles are clean enough.
