| <p>LEE CHUN KIN</p> | |  | <p>It looks like the simple coke, isn't it? However it's a very extraordinary coke that it was the first "Space Can" invented by Coca-Cola and it cost \$10000 each!</p> |
| <p>TSANG HING PONG</p> | |  | <p>This is a Coca-Cola can carried by the American Astronaut in 1985. The Coca-Cola Company spent US\$250000 on research and development, which leads the can to be worth nearly v US\$10000. To prevent the leakage of gas in the spacecraft, a drinking string and a valve safety lock are included for safety purpose.</p> |

YUEN CHUN
KI

This can of coke was made for the astronauts' beverage in the universe. The cost of each is almost 10000 US dollars at that time. It had a special design to prevent the coke from leaking in the space.
