

Life-wide Learning Sharing (4A & 4C)

SIU KA HO

I thought that people take drug because of depression. They think they can forget all the negative emotion by taking drugs. Surprisingly, one of the effects brought by cannabis is depression.

WONG LOK YI

Taking drugs will harm our health and affect our daily life activities seriously. For example, taking in cocaine may lead to high blood pressure, acceleration of heart beat and other mental illness. For the sake of our health and our life, we should never try to take drugs.

TSE CHEUK WING

The tools for taking heroin are shown on the photo above. To make the drug achieve the desirable effect, heroin is dissolved in water. People use syringes to inject dissolved heroin.
