DENG TSZ NGA

We watched a film in this room, it told about the history and functions of the water treatment works

LEUNG YING KIT

I think this photo is important, because it represent the whole water-filter system of Ma On Shan Treatment Works. This photo also shows the wasted mud collection system.

TANG HIU LAM

I have chose this photo for the assignment because I think it is the most important photo of the water plant. This photo is model of the water plant. The scale of the model is 1:150. That's means the model's size times 150 will be the water plant's size.

TSE PUI MAN

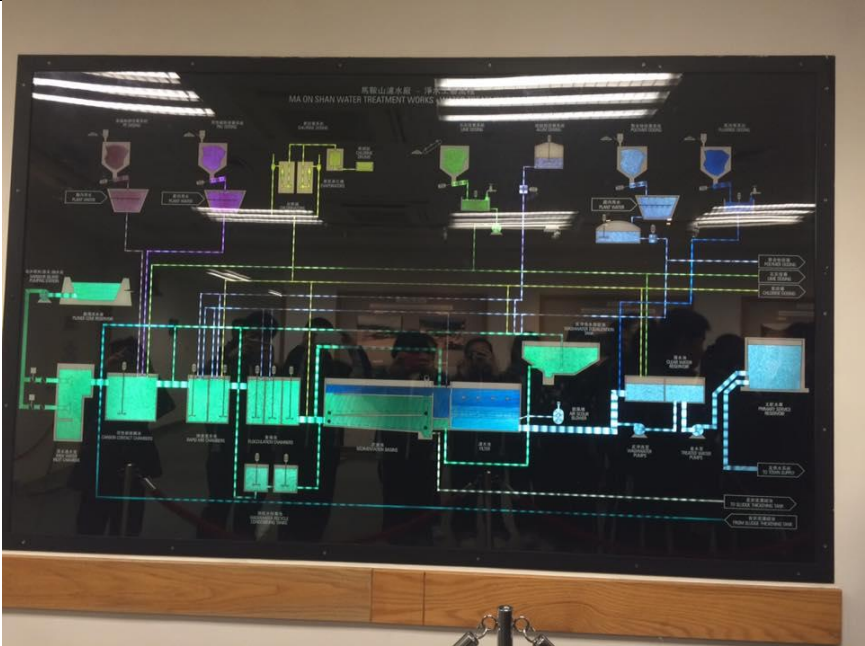

This is a photo of Ma On Shan Water Treatment Works' model. There are some facilities to make the dirty water change to clear water for us to use.

WONG SAU MAN

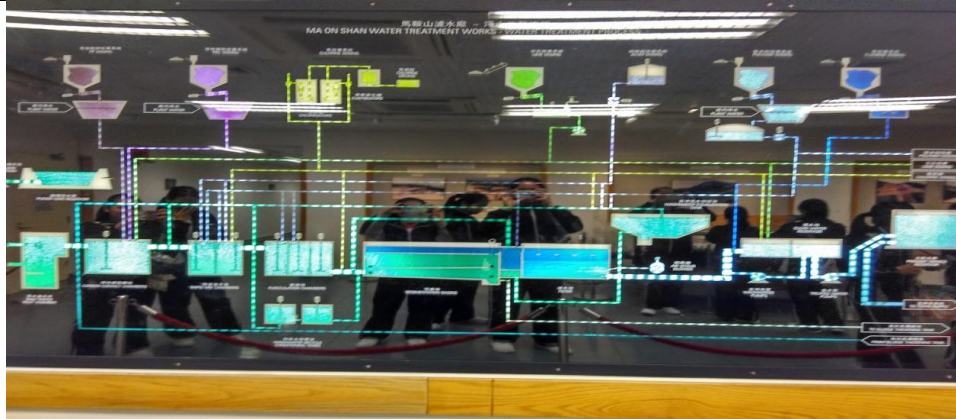

This picture shown that the main control room of the Ma On Shan Water Treatment Works.

WONG WING NAM

It is a electronic board. It tell us the water purification process, teaches us how the raw water become clean water step by step. It's very beautiful.

YE NGA MAN

This is the picture of the water treatment process.

YIU HIU TUNG

This is a photo about the distillation system in Ma On Shan Treatment. Raw water will be distilled to drinking water through this system.
