

LWL Sharing (4A, 4B and 4C)

CHEN HUI

Town Gas Company let us cook some cuisine to prove that cooking in town gas is much faster than the induction cooking because town gas can transfer heat faster.

CHUNG TSZ CHING

This is the control centre in North Point Town Gas Centre.

KWOK WING YAN

This is the control center of Towngas. The technicians can check the status of the gas delivery pipe via the system and make the necessary adjustments.

LEE TSZ YING

It is a centre for solving citizens' problems about town gas.

LI CHUN HO

We have seen that gas stove and cooker to cook the fried fish. They are different. Gas stove releases more heat than cooker.

LAI WING MAN

In this photo, there is a small exhibition on several early products of the Town Gas Company. There are a gas lamp and some water heaters.

SO SUNG TIN ELLIOT

We have tried to cook different food with flame cooking and induction cooking respectively. It seemed that flame cooking is a better cooking method which can make food yummier and faster.

WONG HIU LAM

At the last session of our tour, we compared whether town gas or electronic is more efficient for cooking. However, before cooking, the gas stove could not switch on. Town gas company no town gas? How ridiculous it was. The engineer explained it was because of some safety reason afterwards. In conclusion, is town gas really stable? We need to think more.
